Thanks for the introduction Tiff! :)

Coincidentally, Hans Martin is also a 57th top most ranking member of TrueSight DAO for his contribution to our network over the past 2 years.

Alignment of values between TrueSight DAO and Peace on Snow

Quick introduction. The purpose of TrueSight DAO is to build a Better World based on Verifiable Truth. Our mission is to build profitable and successful crowd-sourced based businesses to displace exploitative business practises in various industries so as to restore Social and Environmental Injustice.

Our core values are Autonomy, Integrity and Diversity.

I understood during my prior two interactions with Peace on Snow during Davos these past two seasons, that Peace on Snow seeks to address the issue of social environmental injustice in our world. And it is done by connecting leading and engaging people with different backgrounds from all over the world to address sustainable and generational transformation in an adult and peaceful way

I see alignments in our values and mission.

Premise for our conversation

TrueSight DAO is right now basically a pure online community that governs itself through the issue of governance tokens for contributions made by members to further our mission and purpose. Over the course of the past two years, projects

and their corresponding guilds have organically formed within our DAO. Some of these guilds have progressed to such an extent as to incorporate as legal entities in jurisdictions where real world commercial activities are taking place.

The most active guild now is [Agroverse](#) where we import agricultural produce from small scale marginalized producers in developing countries who grow their crops using environmentally sustainable methods for direct sale to end consumers in Northern America. This addresses the issue of environmental injustice that is prevalent worldwide. Through governance token based governance mechanisms, we seek to address social injustice by allowing governance token holders the ability to vote on and determine the percentage of profit that should be redirected back to these small scale marginalized producers.

Profit that is not directed to these small scale marginalized producers are then channeled back to back the value of governance tokens issued to DAO members for their contribution. This mechanism incentivizes further collaboration and contribution by DAO members to our mission and purpose.

Our needs

At this point in the life cycle of our DAO, we are seeking to set up a real world legal entity as a legal wrapper for our DAO. This legal entity will serve the following function:

- Allow ability for the DAO itself to enter into legal arrangements with other traditional legal entities
- Own shares in the various legal entities setup by the guilds where commercial activities are conducted
- Be the legal entity receiving grants and funding from organizations that seeks to support our mission and purpose
- Keeper of the bank account where our DAO's fiat currency used to back the value of our governance tokens will be kept.
- Become the legal issuer and holder of our DAO's governance tokens

I understood from Tiffany that Peace on Snow association (the legal entity) might be just the right vessel container for this as there is still much room within its internal core for definition and structuring.

Where we are

Right now, our online community is governed by 10 members who are top contributors elected by our Algorithm every 90 days based. The next set of governors will be nominated into position tomorrow during the Summer Solstice.

7	Governors of our DAO	
8	Name	Past 90 days contributions
9	Gary Teh	22,659
10	Aléksa Mil	15,325
11	Jascha Martschenko	6,545
12	Fatima Toledo	3,421
13	Jacob Nelan	2,722
14	Iwona Fluda	2,475
15	Suheil	2,420
16	TrueTech Inc	1,571
17	Anupa Dasgupta	1,404
18	Tomas Bernabo	1,400
19		

Past this current transition, we will be transforming our governorship structure to more closely align with the Association board format in the Swiss jurisdiction as proposed by Iwona (our contributor) in this [document stating duties and responsibilities](#) of governors/board members.

The Ask

Please do let us know if Peace on Snow:

1. is keen to merge with TrueSight DAO into one entity. Ideally we can rebrand the entity as TrueSight DAO
2. has space internally and is keen on adopting these set of practices for regarding the [board management](#).
3. has space internally to adopt the operating procedures which we utilize to govern [DAO members activities/contributions](#)

We are happy to discuss how we will have representation of members from both TrueSight DAO and Peace on Snow sitting on the new board.

Warm regards

Gary
