Problem

Lack of trust impedes revenue and increase marketing cost for strategy based crypto ETF creators

Unverified Marketing

Gary S Goy
December 20, 2021 at 10:42 AM · [•](#)

good thing need time to develop.
This is the result of my 10 years research and development of a powerful robot.
9h40m 2% strategy make 197.61
十年磨一剑，经过10年研究和开发，终于有了一个稳定的赚钱的数字货币机器人
Wan, 9小时40分钟 2% 策略赚取 197.61

You and 6 others 4 Comments

A screenshot of a social media post by Gary S Goy. The post includes a profile picture of a man, a timestamp, and a message about a 10-year research project. It features a large red rectangular stamp with the words "NOT TRUSTED" in white capital letters. Below the stamp is a screenshot of a mobile app interface showing a trading strategy result with the code "GMS123456", a timestamp of "JLF 12-20 08:03", and a target achieved value of "197.61". At the bottom of the app screenshot, it says "You and 6 others" and "4 Comments".

Our Solution

The Most Exciting NFT Wars
in the Metaverse

Meets

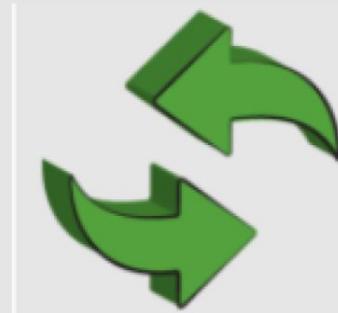

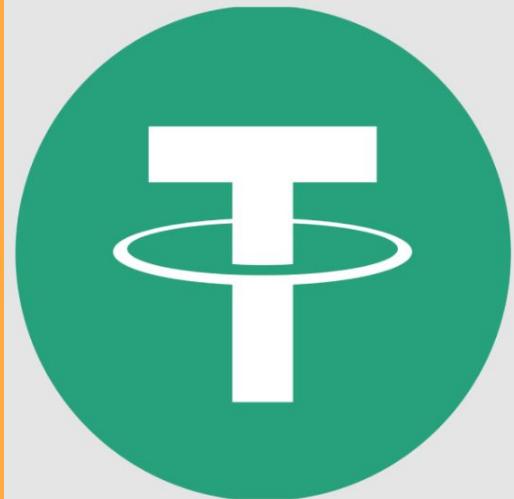

Part 1: Building Reputation

is fun...

How it works

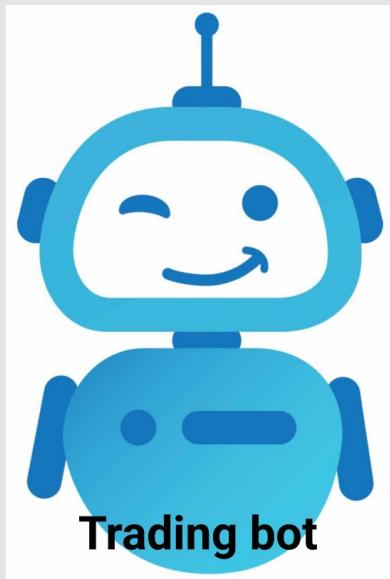

User buys TRUESIGHT with USDT

Pay **USDT** to buy **TRUEVISION**

How it works

Owner creates an NFT for his Bot or Trading Strategy

pay

3

How it works

Each NFT is allowed to create only 1 prediction per day

creates
prediction

encrypts
the asset name and
predicted price movement
direction
with
private key

Intelligent
NFT

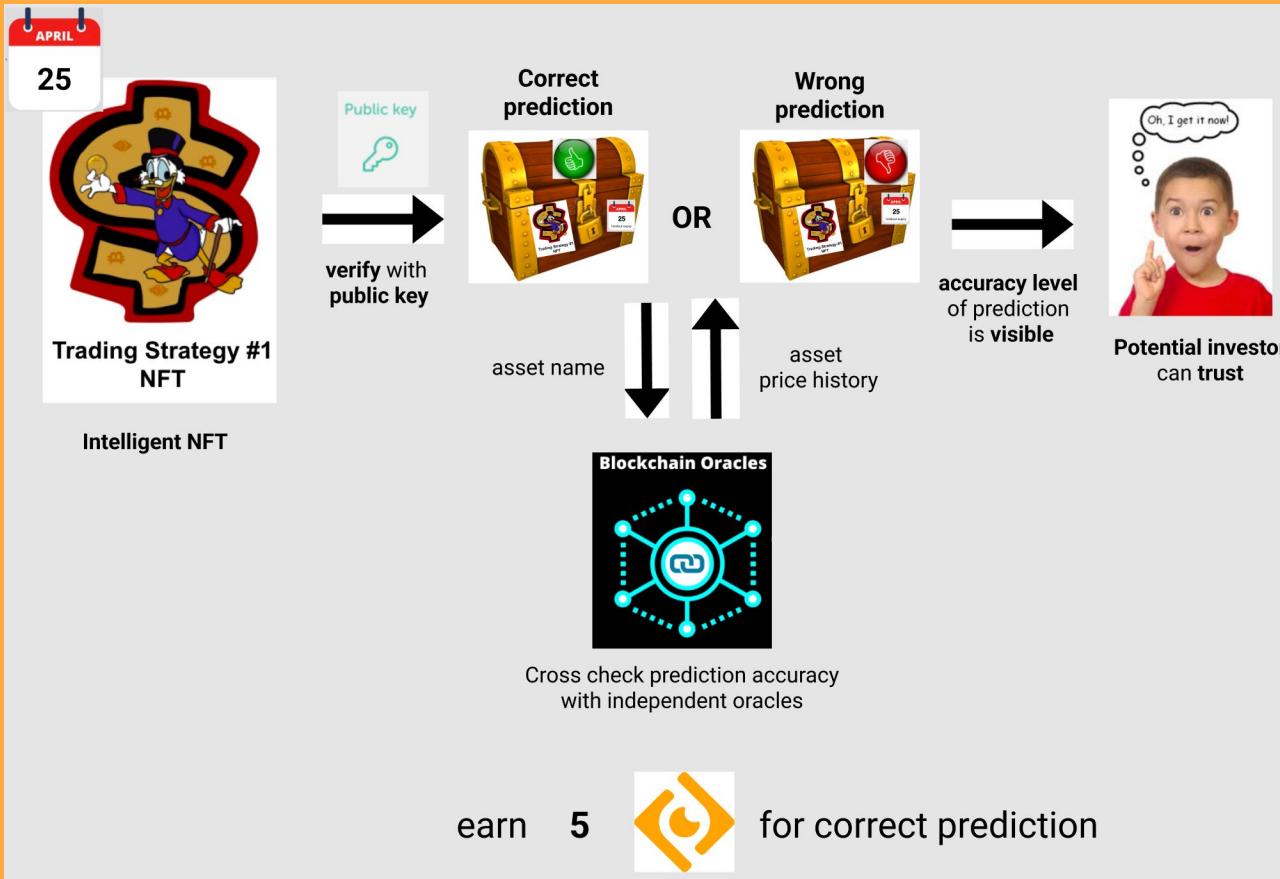

Pay 3

To create prediction cache

How it works

NFT earns for correct prediction

How it works

Public can inspect blockchain to check accuracy

80% Accuracy Level

How it works

Public can pay NFT to buy its prediction

Trading Strategy #1
NFT

Owner of NFT
receives 95% of
USDT paid

Public key

gives public key

price quoted

Happy Buyer
pays 100% of price quoted

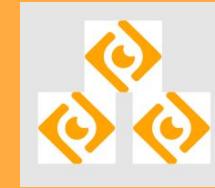

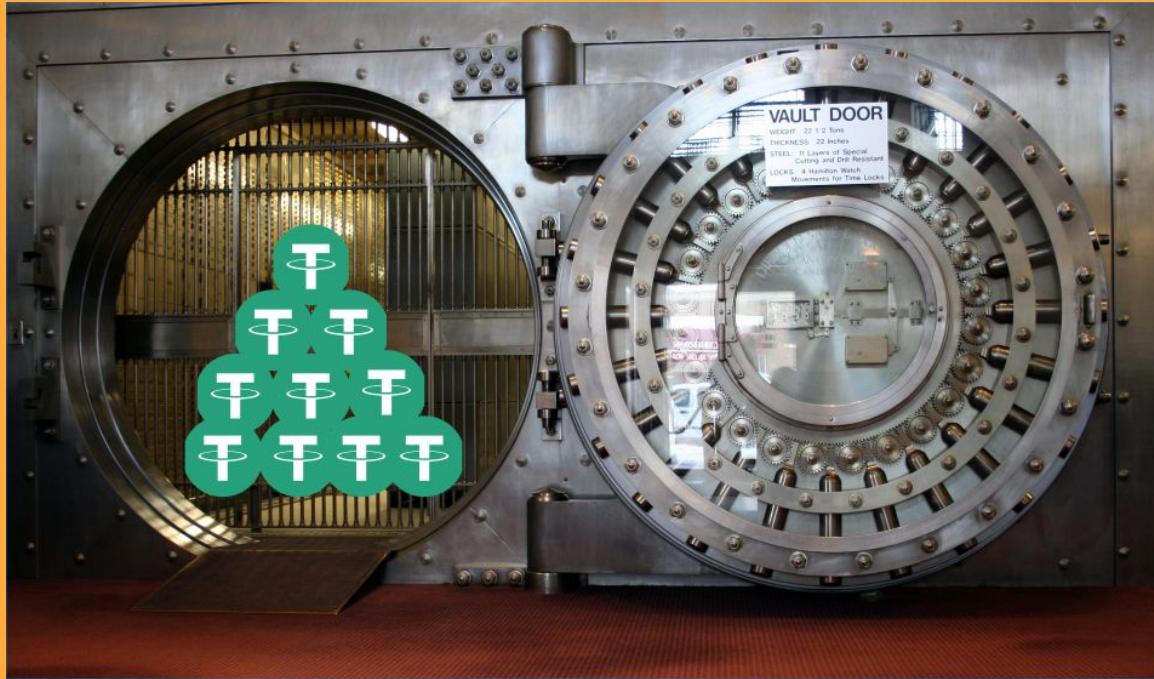

DAO's Vault
charges 5% processing fee

Part 2: Gaming Mode

amping up in the excitement

How it works

Our DAO seeks to maintain
1 USDT in vault to 1 TRUESIGHT in circulation

How it works

A 7 days NFT WAR is declared when
USDT in vault is 5% more than TRUESIGHT in circulation

How it works

NFT owner can pay to join the NFT WAR

Trading Strategy #1
NFT

100 Pay to Play

Participating NFTs

Trading Strategy #2
NFT

Trading Strategy #3
NFT

Trading Strategy #4
NFT

How it works

Punter can bet on participating NFTs

Trading Strategy #3
NFT

56%

Trading Strategy #4

67%

Trading Strategy #1
NFT

80%

Trading Strategy #2
NFT

76%

How it works

Earnings distributed at end of the NFT WAR

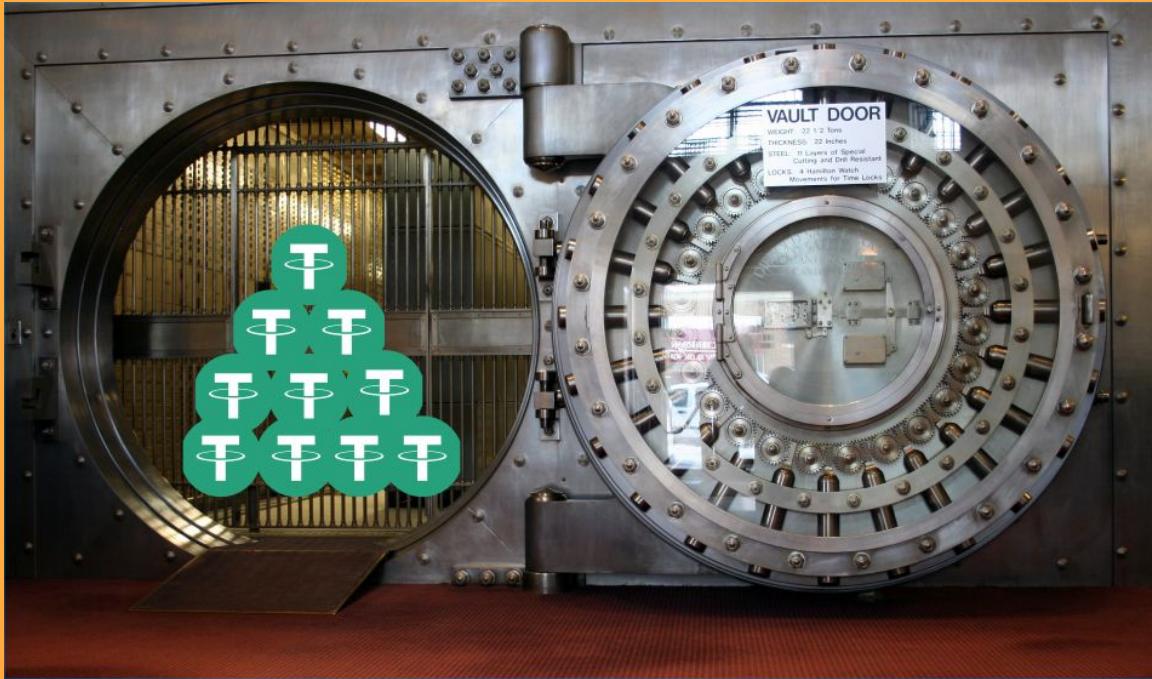

Winning NFT Owner
gets
distribution from
Racer's Pool
and
50% TRUESIGHT
rebase issues

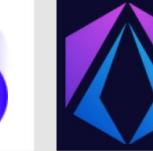

Winning Punters
get
distribution from
Punter's Pool
and
50% TRUESIGHT
rebase issues

How it works

USDT to TRUESIGHT balance is restored
