Hello, just circling back on my earlier note about delivering 10–12 qualified leads monthly through our AI-driven outreach.

Understand inboxes can be chaotic. No problem if this got buried.

Quick question. What's your main challenge with lead generation right now?

Pipeline consistency? Lead quality? Time investment? Response rates?

Our system usually tackles all three with minimal lift from your team.

Curious to know more? Happy to share details.

Best,

Does the lead mean the prospects says yes we are interested or the lead mean just up to the point of outreach

How do you go about generating new leads
