Good afternoon Graziela,

I am right now considering which of these two door-to-door shipment configurations to choose for shipping the cacao supplies from our warehouse in Ilheus, Brazil to our warehouse in San Francisco for restocking. They are a mix of cacao nibs, cacao mass and cacao almonds (all are HS Code 1803.10).

The main difference is the shipping weight, which determines the cost savings per kilogram we will achieve by freighting a larger payload. Other factors I am also balancing internally are the amounts we need to keep available in Brazil for producing dark chocolate bars later on.

Could you please provide two sets of quotations?

First Quotation (Door-to-Door):

- Pickup Location: R. Cel. Paiva, 46 - Centro, Ilhéus - BA, 45653-310, Brazil
- Destination Address: 1423 Hayes St, San Francisco, CA 94117
- shipment size: 250kg see shipping manifest

Second Quotation (Door-to-Airport):

- Pickup Location: R. Cel. Paiva, 46 - Centro, Ilhéus - BA, 45653-310, Brazil
- Destination Address: 1423 Hayes St, San Francisco, CA 94117
- shipment size: 375kg see shipping manifest

Regarding FDA Prior Notice and Customs Clearance:

- FDA Importer of Record: TrueTech Inc (EIN: 88-3411514 | CBP Importer Number: 88-341151400)
- Exporting Entity: Black King (Brazilian Exporter CNPJ: 50.042.585/0001-80)

I have attached a copy of our internal shipping manifest and an items breakdown for your reference. I am waiting for these figures before finalizing my proposal to the client.

Looking forward to hearing from you.

Warm regards,

Gary
