

One Bag, One Tree — FounderHaus Farm Edition

TrueSight DAO × FounderHaus · 100-bag cacao tea collaboration · August 2026

The farm begins with these trees.

Each of the 100 bags in this batch carries a unique, ledger-registered QR code. The cacao is single-estate Oscar's Farm, Bahia, 2024 (provenance verified by QR). Every bag sold finances one tree — and these first 100 trees are the founding grove of the FounderHaus farm. Buy a bag of tea; the farm grows. Scan a bag's QR and you'll see the photo below — the people who planted the first trees.

The founding grove — tree planting at the FounderHaus volunteer site, 21 August 2026. (L–R: Juliana Melo, Cristian Crispim, Gary Teh, Paloma)

Terms of this batch

Bag	Cacao Tea 50g — Oscar's Farm, Bahia Brazil, 2024 (single-estate, loose cacao-shell tea)
Price	\$5 USD per bag for this batch of 100 bags

Batch value	\$500 USD (100 × \$5)
Batch	2024OSCAR_CT_20260820_1..100 — 100 serialised packets, each with its own QR code
Per bag	1 FounderHaus Tree Planting Pledge (QR Code) — \$1.50/tree
Trees	100 trees → the first 100 trees of the FounderHaus farm (Atlantic Forest biome, Santa Catarina)
Ledger	AGL4 — every sale and every pledge is booked on the audited SunMint ledger

Scan a bag — see its story

2024OSCAR_CT_20260820_1

Scan this QR code (sample from the batch) to see the bag's live provenance page — including the photo above.

Ledger check (Edgar): edgar.truesight.me/agroverse/qr-code-check

How it works

1. The 100 bags are consigned to FounderHaus at **\$5 USD per bag** (QR batch 2024OSCAR_CT_20260820_1..100).
2. Each sale books a FounderHaus Tree Planting Pledge (\$1.50) on the AGL4 ledger — earmarked to FounderHaus Farm.
3. When trees are physically planted at the FounderHaus farm, the pledge is fulfilled and the planted trees are registered on the same ledger.
4. Customers scan the QR on their bag to see provenance, the pledge, and (once planted) the tree's photo and location.

Already underway

On 21 August 2026, Gary Teh, Paloma, Juliana Melo and Cristian Crispim planted the first trees together at the volunteer site — the seed of this collaboration. Every bag in this batch extends that grove.

TrueSight DAO — restoring 10,000 hectares of Amazon rainforest, one bag at a time. · This document is a collaboration detail, not a binding agreement.
