AORA × AGROVERSE Cacao Rainforest Adventure

Complete Event Flow & Venue Layout · Shenzhen Pilot · July 2026

Pre-Event Check-in 20–30 min + Main Event 90 min = Total Duration ~110–120 min

1. 时间结构 | 2. 90分钟主流程 | 3. 关键转场 | 4. 供应链游戏 | 5. 场地布局 | 6. 场地需求

1 Overall Time Structure

Phase	Duration	Content
Pre-Event Check-in	20–30 min before the event	Children arrive, complete Aora armband printing and certification. Early arrivals browse displays, view samples, and take photos in the Prelude Area. The facilitator interacts with early families to warm up the atmosphere.
Main Event	90 min	A complete seven-act experience from Prologue to Epilogue. Check-in does not consume main event time.
Total Duration	~110–120 min	Including pre-event check-in, comfortably fitting within a half-day schedule without causing fatigue for parents and children.

2 Main Event 90-Minute Timeline

Time	Segment	Duration	Cum.	Core Experience	Transition Logic
0:00	**Prologue · Prelude Area**	5 min	5 min	"Aora Expedition Team, assemble!" The facilitator tells the story of discovering Aora Kuku and introduces the gift set samples. Children wear their armbands and take photos in the Prelude Area.	Check-in already completed during pre-event; children naturally enter the Prelude Area wearing armbands.
0:05	**Act One · The Rainforest Gate**	2 min	7 min	Gary steps out from behind the curtain, gives a brief welcome, and opens the curtain. Rainforest sound effects rise. Children follow Gary into the Main Experience Area.	Facilitator: "Gary is waiting for you. Are you ready?"
0:07	**Act Two · Aora Interactive Zone**	8 min	15 min	Aora companion settles into the rainforest — scan Aora into the projection scene (or paste onto the backdrop wall). Facilitator: "Your Aora has made its home in this rainforest. From now on, it will always be with you."	The first thing after entering the rainforest is to settle Aora in, then take it along to explore.
0:15	**Act Three · Sensory Exploration Zone**	15 min	30 min	**Pure nature experience, not linked to the Supply Chain.** 👃 Smell Station: smell cacao beans, moist soil, vanilla pods — get to know the flowers and fruit of the cacao tree 🖐 Touch Station: touch moss, bark, cacao pod husks — feel the skin and veins of the rainforest 👁 Sight Station: view enlarged fungal network micrographs and agroforestry layering diagrams — discover the underground internet 👂 Sound Station: listen to pre-recorded rainforest animal sounds — meet the neighbours of the rainforest Aora Kuku standee cards are placed beside each station; the facilitator paints ecological pictures with words.	After Aora settles in, take it along to discover the secrets of the rainforest. The four stations rotate independently, experiencing symbiotic ecology.
0:30	**Transition**	1 min	31 min	The facilitator naturally transitions: "Your Aora has taken you all over the rainforest — smelling the fragrance of cacao flowers, touching bark and moss, seeing the underground fungal network, and hearing the sounds of all kinds of animals in the forest. This rainforest is the home of the cacao bean. Now, the cacao bean is leaving home — it is going to go on a long journey to become chocolate. Do you want to become a cacao bean with your Aora and go on an adventure?"	A natural transition from "getting to know the rainforest" to "the bean leaves the rainforest to go on an adventure." The Sensory Exploration Zone is a rainforest ecosystem experience; the Supply Chain board game is the bean's journey — two independent modules with a coherent narrative.
0:31	**Act Four · Supply Chain Board Game Round 1**	18 min	49 min	**The Great Bean Adventure · Floor map game, independently completing all seven stations.** 🫧 Bubble Bath Station (Fermentation): smell beans at different fermentation stages, stamp 🌞 Sunny Beach Station (Drying): mimic turning motions, stamp 🚛 Bean Dash Station (Transport): pass and touch burlap sacks, push game pieces to the port ⚖️ Bean Fork Road (Trade Choice): choose between green-backed and orange-yellow-backed cards 🏭 Magic Transformation Station: the bean becomes chocolate, receive a medal	An independent supply chain experience, completing the full journey from fermentation to the chocolate factory. At the fork road, children choose a card-back colour based on intuition, with no suggestive guidance whatsoever.
0:49	**Act Four · Supply Chain Board Game Round 2**	10 min	59 min	Children choose freely: 🚀 **Continue:** quickly restart from the beginning and take the path not previously chosen 👀 **Spectate:** sit at the finish line and observe which path the continuing children choose 😴 **Rest:** flip through the passport, stay quietly	Facilitator: "Those who want to go again can try the other path. Any choice is fine — it's your own decision."
0:59	**Act Five · The Magic Workshop**	15 min	74 min	🍫 **Supply Chain finish → Magic Workshop natural transition:** "Just now you watched the beans turn into chocolate. Now, it's your turn to make chocolate with your own hands!" Using Fair Trade chocolate liquid, custom moulds and toppings, children make chocolate by hand. After pouring the chocolate liquid into moulds, they are placed in a portable refrigerator to set. Gary quietly joins to observe or assist.	The finish point of the Supply Chain (beans becoming chocolate) seamlessly connects with the start of the Magic Workshop (making chocolate by hand) — from "watching the transformation" to "creating with your own hands."
1:14	**Act Six · Starlit Campfire**	8 min	82 min	⭐ Gary shares his true story with Aora Kuku in the cacao rainforest. The main projection wall switches to a starry sky / campfire scene. The chocolate is setting in the refrigerator (~10–20 min) — when the story ends, the chocolate will be almost ready.	The waiting time for the chocolate to set is exactly the time for Gary to share his story. Children sit around listening, with the aroma of chocolate still in the air.
1:22	**Epilogue · Rainforest Wishes**	8 min	**90 min**	📜 The chocolate has set! Award explorer certificates. 📖 Story picture book sample display — the facilitator picks up a sample: "Your Aora story can also become a picture book like this." 💻 Story Demo Area — laptop + printer live demonstration of the story creation flow, printing "Story Seed Cards" 📷 Group photo farewell — Gary takes a group photo with the children against the starry sky backdrop	The story ends, the chocolate sets, certificates are awarded, Story Seed Cards are printed — four "harvests" happen simultaneously for the highest emotional density.

3 Key Transition Points

🔗 Transition 1

Sensory Exploration → Supply Chain Board Game

"Your Aora has taken you all over the rainforest — this rainforest is the home of the cacao bean. Now, the cacao bean is leaving home — it is going to go on a long journey to become chocolate. Do you want to become a cacao bean with your Aora and go on an adventure?"

🔗 Transition 2

Supply Chain Board Game → Magic Workshop

The finish point of the Supply Chain is the Magic Transformation Station — children see the beans become chocolate. The facilitator naturally transitions: "Just now you watched the beans turn into chocolate. Now, it's your turn to make chocolate with your own hands!" A seamless flow from "watching the transformation" to "creating with your own hands."

🔗 Transition 3

Magic Workshop → Starlit Campfire

After pouring the chocolate liquid into moulds, it needs 10–20 minutes to set. The facilitator: "The chocolate is slowly setting. While we wait, Gary would like to share a story with you." The chocolate "quietly transforms" in the refrigerator while the children sit around listening to the story.

🔗 Transition 4

Starlit Campfire → Rainforest Wishes

Gary's story ends, and the chocolate has also set. The facilitator: "The story is finished, and your chocolate has set too — go and see the chocolate you made with your own hands!" The story ends, the chocolate sets, and certificates are awarded — three "harvests" happening simultaneously.

4 Supply Chain Board Game Core Mechanism Overview

The Supply Chain board game "The Great Bean Adventure" runs independently for a total duration of ~28 minutes (Round 1: 18 min + Round 2 free choice: 10 min). The complete design can be found in the separate document "The Great Bean Adventure · Supply Chain Learning Module · Large Floor Board Game Design."

🎨 Card Back Design

Green Card Back: Deep green solid `#2d5e2c` (event title colour), cacao leaf silhouette pattern — represents one trade model

Orange-Yellow Card Back: Vibrant orange-yellow solid `#FFD966` (event card background colour), cacao bean silhouette pattern — represents another trade model

Both colours are directly taken from the event's theme colour palette as solid colours. Solid card backs are clean and simple, easy to print, and fully unified with the event's overall visual style. Cacao leaves and cacao beans are both parts of the cacao tree, with no good or bad distinction. Children choose purely based on their intuitive preference for "I like green" or "I like orange-yellow."

Dimension	Green Card Back Set	Orange-Yellow Card Back Set
Rhythm Characteristics	Steady, more waiting moments, but good outcomes often follow waiting	Faster, more opportunities to advance, but speed often comes with costs
Real-world Reflection	More complex processes, but more stable farmer incomes	Higher efficiency, but unstable farmer incomes
Typical Experience	"Wait — certification, training, voting — then good things happen"	"Zoom fast, but occasionally encounter price drops or middlemen demanding extra fees"
Round 2	Children freely choose whether to go again and take the previously unchosen path. They can also choose to spectate and observe, or rest quietly. At the finish, everyone sits in a circle and shares their different experiences of the two paths. The facilitator does not judge and does not give conclusions.	

5 Venue Layout

📐 Design Note

The following venue layout and area requirements represent an ideal preliminary concept. In actual execution, adjustments can be made flexibly according to the specific venue conditions, provided that the event flow remains complete and the experience quality is maintained. All area sizes, proportions, and relative positions are suggested values and can be fine-tuned during actual setup based on the actual venue layout.

Total Area: 220–250㎡ (ideal value, adjustable based on actual conditions). A rectangular layout is best (width ≥12m, depth ≥14m).

Capacity: ~40–55 people (10–15 families — some may have both parents attending — plus 7–9 staff members).

Spatial Division Logic:

Preparation Area (left side, vertical axis): Check-in Station → Prelude Area → Spatial Divider. Occupies ~55–65㎡. The Prelude Area needs to accommodate parents lingering, socialising, taking photos, and moving around.

Main Experience Area (right side, horizontal along the main projection wall): Aora Interactive Zone → Sensory Exploration Zone → Adventure Zone (Supply Chain) → Magic Workshop → Inspiration/Finale Area. Occupies ~155–185㎡. Children maintain a consistent viewing distance of ~3–4 metres from the screen.

Connection Entrance: Spatial Divider (curtain / movable partition / fabric drape). Gary opens the curtain here to invite children into the Main Experience Area.

Flow Description:

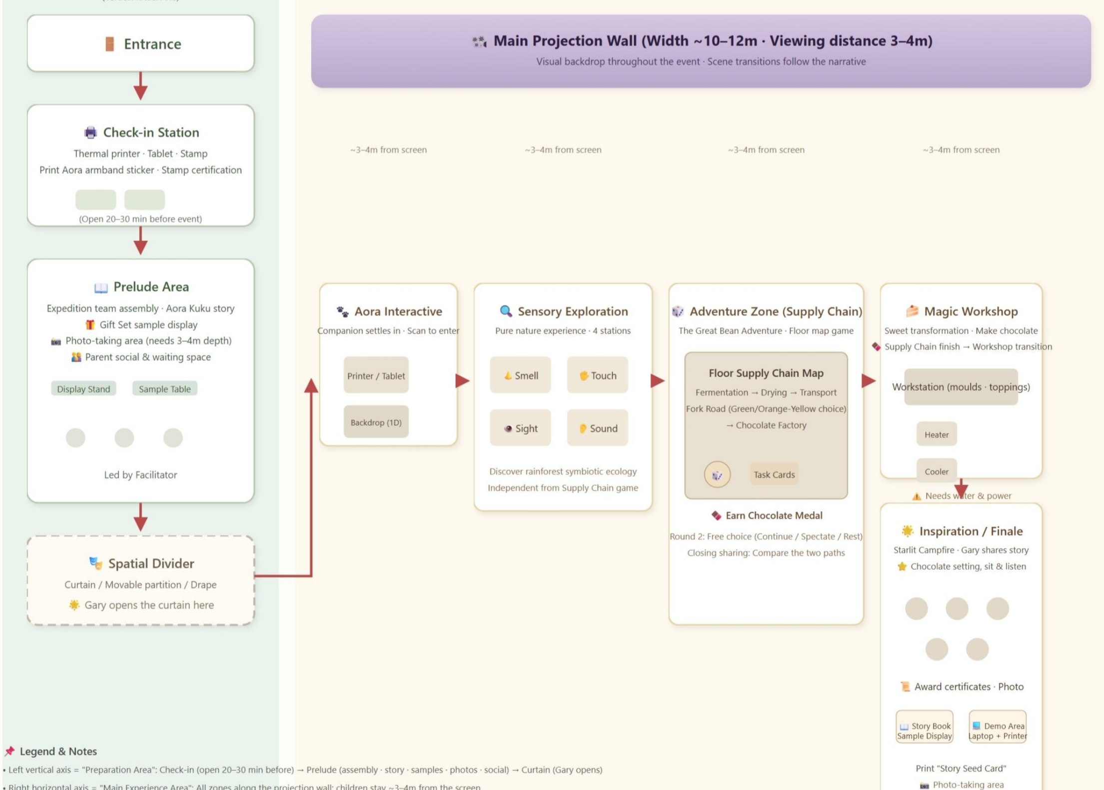
```
Entrance (top left) → Check-in Station → Prelude Area → Spatial Divider (Gary opens curtain) → Aora Interactive Zone → Sensory Exploration Zone → Adventure Zone (Supply Chain) → Magic Workshop → Inspiration/Finale Area (with Story Demo Area and picture book sample display) → Exit (bottom right)
```

One-way flow throughout, no backtracking. The Preparation Area flows vertically; the Main Experience Area flows horizontally.

Zone	Functional Area	Suggested Area	Key Configuration Points
Preparation Area	Check-in Station	6–8㎡	Small square table, printer, tablet, stamp, armband bases
	Prelude Area	46–50㎡	Display stands, sample table, stools, facilitator position, photo-taking area (needs 3–4m depth), parent social and waiting area
	Spatial Divider	4–6㎡	Curtain / partition, ~2 metres wide
Main Experience Area	Aora Interactive Zone	~16㎡	Printer / tablet (Plan 1C) or physical backdrop wall (Plan 1D)
	Sensory Exploration Zone	~40㎡	Four station tables, station standee cards, Aora Kuku cards
	Adventure Zone (Supply Chain)	~50㎡	Large floor-laid Supply Chain map, game props, needs ample walking space
	Magic Workshop	~28㎡	Three workstations, heating/cooling equipment, ⚠️ needs independent water & power
	Inspiration/Finale Area	~38㎡	Cushions/seats, focus lights, story picture book sample display, Story Demo Area (laptop + printer), photo-taking area (needs 3–4m depth)

Relationship Between Zones and Projection Wall:

Zone	Distance from Screen	Viewing Nature
Aora Interactive Zone	~3–4m	**Focus Moment:** Looking up to see Aora enter the scene
Sensory Exploration Zone	~3–4m	Atmospheric backdrop: attention on hands-on materials
Adventure Zone (Supply Chain)	~3–4m	Atmospheric backdrop: attention on the floor map
Magic Workshop	~3–4m	Atmospheric backdrop: attention on the workstation
Inspiration/Finale Area	~3–4m	**Focus Moment:** Sitting around listening to Gary share; the projection is the visual focus



6 Venue Requirements

📐 Design Note

The following venue requirements represent an ideal preliminary concept. In actual execution, adjustments can be made flexibly according to the specific venue conditions, provided that the event flow remains complete and the experience quality is maintained. All specifications are suggested values; the core principles are to ensure a linear one-way flow without backtracking, that all Main Experience Area zones can see the main projection wall, that the Magic Workshop is near a water and power source, and that there is a clear division between the Preparation Area and the Main Experience Area.

Requirement	Specification
Venue Type	Indoor space (shared event space, family studio, art gallery, multi-purpose room, etc.)
Total Area	220–250㎡ (ideal), with 220㎡ as the baseline. A rectangular layout is best (width ≥12m, depth ≥14m). **Can be flexibly adjusted based on actual available space; priority is to ensure the width of the main projection wall and smooth flow between zones.**
Capacity	~40–55 people (including 10–15 families — some may have both parents attending — and 7–9 staff members)
Main Projection Wall	One complete horizontal wall (width ≥10m ideal) or a long wall where a projection screen can be installed. **If the actual wall is smaller, a width of ≥8m is acceptable, with zone spacing adjusted accordingly.**
Air Conditioning	Sufficient (July high temperatures)
Water & Power	Basic water and power available (the Magic Workshop area needs simple cleaning facilities and power)
Floor	Level (a map needs to be laid out in the Adventure Zone)
Light Control	Ability to block natural light (curtains or blackout cloth) to ensure projection quality in the Main Experience Area
Spatial Division	Ability to set up a curtain or partition about 2 metres wide on one side of the space to divide the Preparation Area and the Main Experience Area. **If the venue layout does not easily accommodate a left-right split with vertical-horizontal axes, the relative positions of the Preparation Area and Main Experience Area can be adjusted according to actual conditions.**
Wi-Fi	Stable internet connection (for the story creation demo segment)
Depth	Sufficient depth for two photo-taking areas (Prelude Area and Inspiration Area)
Space Quality	The space should ideally be free of pillars or dead corners; the Prelude Area needs to accommodate parents and children lingering, socialising, waiting, and moving around
Tables & Chairs	Basic tables and chairs available or rentable
